FORWARD

BY PAUL VANN

Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world.

Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world.

ISSUE 1

Thinking at the Microscopic Level

An exploration of Quantum cognition, and how our brains may lean more on quantum-logic than we previously thought.

Predictability in Conversation

Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world.

2035 Sneaker Mock-up

What does the future of modern athletic wear look like? We explore both the what, and the why.

THINKING AT THE MICROSCOPIC LEVEL

A discussion on quantum logic, it's prevalence in our thinking.

BY PAUL VANN

Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world.

Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world.

We explore how modern AI is making this a challenge in the virtual world. We explore how modern AI is making this a challenge in the virtual world.

Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world.

Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world.

“QUANTUM LOGIC, IS PREVALENT IN EVERYTHING.” - EINSTEIN

Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. We explore how modern AI is making this a challenge in the virtual world.

P

2035 SNEAKER MOCKUP

The future of modern Athletic Wear

“SLEEK. ELEGANT.
THE FUTURE.” -
VOGUE

Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world. Communication is pointless if the recipient can fully predict what the transmitter will say. We explore how modern AI is making this a challenge in the virtual world.
